

ASSEMBLER

Medical Murray is a leading medical device development and manufacturing company serving clients throughout the world.

Medical Murray focuses on providing its clients with any or all of the development engineering and/or manufacturing services required to move a new medical device along the development path from concept to production.

Our focus is on three market areas: less invasive vascular, urologic and surgical applications. Our core experience is with custom catheter systems and components, complex disposables and implantables.

We're looking for team players with a can-do attitude to share in our vision and corporate values. Medical Murray offers competitive salaries, a comprehensive benefits package, and an energetic work environment.

Currently, we are searching for an Assembler to join our facility located in Lake Zurich, IL.

Job Description:

- Produce small assembled parts according to product specs
- Manufacturing processes to produce product include drilling, cutting, measuring, mounting, and assembling
- Maintain good working relationships with other co-workers
- Keep track of materials, tools and procedures as the device is manufactured
- Have good hand eye coordination and be able to work under a microscope
- Have a good basic level of mechanical ability
- Have and demonstrate good judgment
- Have the ability to maintain confidential information, in accordance with Company policy
- Have the ability to work with little supervision and complete assignments accurately and in a timely manner
- Have the ability to work daily and overtime as required
- Have the ability to assist in other work related areas as required
- Have the ability to use a variety of assembly equipment and hand tools including but not limited to: tweezers, razor blade, scalpel, wire cutter, clippers, needle nose pliers, screwdriver, Allen wrenches, and ring light (magnifying glass)
- Have the ability to use a variety of assembly equipment including lab oven, glue dispenser, trimming lathe, and computer operated saw
- Be able to do occasional lifting of up to 25 pounds

Skills/Qualifications:

- High School Diploma or equivalent experience
- 2-5 years manufacturing experience (medical device production experience preferred).
- Good hand to eye coordination
- Good listener and ability to follow detailed oral and written directions well
- Reliable and good work ethic
- Able to read, write, speak and understand English.
- Perform different tasks daily
- Write log entries
- Work mostly on feet or at a bench utilizing a microscope for assembly
